

Zorro-Flow®

Reimbursement Guide

Product Overview & Indication

Zorro-Flow is an external urine collection device designed for neonates, infants, and children. It is indicated for urine collection for up to 24 hours by trained medical personnel in the inpatient or outpatient settings.

DRG CODES

DRG Code	Description
DRG 683	Renal Failure with Complications or Comorbidities
DRG 684	Renal Failure without Complications or Comorbidities
DRG 685	Kidney and Urinary Tract Infections with Complications or Comorbidities
DRG 686	Kidney and urinary Tract Infections without Complications or Comorbidities
DRG 698	Other Kidney and Urinary Tract Diagnoses with Complications or Comorbidities
DRG 699	Other Kidney and urinary Tract Diagnoses without Complications or Comorbidities
DRG 871	Septicemia or Severe Sepsis without MV (Mechanical Ventilation) 96+ Hours with MCC (Major Complications or Comorbidities)
DRG 291	Heart Failure and Shock with MCC (Major Complications or Comorbidities)
DRG 292	Heart Failure and Shock with CC (Complications or Comorbidities)

HCPCS CODES

HCPCS Code	Description
A4326	Male external catheter integral collection chamber
A4327	Female external urinary collection device meatal
A4328	Female external urinary collection device pouch
A4331	Extension drainage tubing, any type, any length, with or without connector, with or without clamp
A4333	Urinary catheter anchoring device, adhesive, skin level, each
A4334	Urinary catheter anchoring device, leg strap, each
A4349	Male external catheter, with or without adhesive, disposable, each

ICD-10 CODES

ICD-10 Code	Description
R34	Anuria and oliguria
N17.0	Acute kidney failure with tubular necrosis
N17.1	Acute kidney failure with acute cortical necrosis
N17.2	Acute kidney failure with medullary necrosis
N17.8	Other acute kidney failure
N17.9	Acute kidney failure, unspecified
R82.90	Unspecified abnormal findings in urine
Z13.9	Encounter for screening, unspecified

About this Guide

This guide was assembled in partnership with Epstein, Becker, and Green to provide general information about codes that may be relevant to the use of the Zorro-Flow. **Quantitative urine output assessments will help diagnose acute kidney injury* which may improve higher quality coding that is necessary to properly document organ dysfunction, severity of illness, and mortality risks.**

This guide does not constitute legal or reimbursement advice. This guide has been assembled for your convenience only and it is NOT intended to guide medical decision making or to inform coding decisions. Individuals and institutions using the Zorro-Flow are solely responsible for determining medical necessity and for selecting the appropriate code(s) that apply to the device and patient services provided.
